Education

Oregon State University

Corvallis, OR

PhD Robotics and AI (GPA: 3.9/4.0)

2020-2024

- Advisor: Dr. Julie A. Adams
- Dissertation: "Adaptive Workload Estimation for Human-Robot Teams"

University of Arkansas

Fayetteville, AR

MS Computer Science (GPA: 3.8/4.0)

2015-2017

- Advisor: Dr. Michael Gashler
- Thesis: "How neural networks learn from the experiences of peers through periodic weight averaging."

University of Arkansas

Fayetteville, AR

BS Computer Engineering (GPA: 3.3/4.0)

2011-2015

- Minors in Math, Physics

Professional Experience

2023- **Lab Lead**, Oregon State University, Human Machine Teaming Lab

2020- **Graduate Research Assistant**, Oregon State University, Human Machine Teaming Lab

2017-2020 **Senior Software Engineer**, HERE Technologies

2015-2017 **Graduate Teaching Assistant**, EECS Department, University of Arkansas

2016 **Research Intern**, Dynamic Systems and Controls Branch, NASA Langley Research Center

Skills

- **Technical Skills:** Python | C++ | Java | C# | Scala | Pytorch | ROS | CUDA | Pyro | Pandas | Unity | AWS | Machine Learning | Bayesian Inference | Planning Algorithms | Reinforcement Learning | Wearable Sensors | Experimental Design | Human Factors
- **Soft Skills:** Effective Communication | Cross-functional Collaboration | Technical Writing | Critical Thinking | Time Management | Research Presentation | Mentoring | Leadership

Research Experience

Oregon State University - Robotics/Artificial Intelligence

Corvallis, OR

Advisor: Dr. Julie A. Adams

2020-2024

- Dissertation: "Adaptive Workload Estimation for Human-Robot Teams"
 - Research focusing on robust and flexible human-robot collaboration.
 - Created an novel human state estimation system that leverages wearable sensors and Bayesian meta-learning methods to model the dynamics of human workload for unknown tasks.
 - Led a team of five researchers in building real-time physiological signal processing software, conducting human-subject studies, creating machine learning models, and programming autonomous robots.
- "Multi Vehicle Management", Sponsor: Universities Space Research Agency
 - Collaborated to design and conduct human subject evaluations to establish appropriate performance parameters for human supervision of multiple uncrewed aircraft operating beyond visual line of sight.
 - Analyzed human factors and hardware considerations required to develop a Concept of Operations outlining criteria for a mutli-uncrewed aircraft system monitoring for signs of early wildland fire.

- “Transparent Management of Hub-based Colonies using a Graph-based Dynamic Model”, Sponsor: Office of Naval Research
 - Improved a Unity-based, human-swarm interface by incorporating a heuristic prediction algorithm that informed operators of the long-term impact of their actions.
- “Resilient Emergent Properties for Autonomous Agent Interactions”, Sponsor: Defense Advanced Research Projects Agency
 - Evaluated a novel swarm agent algorithm that utilized density estimation to evaluate behavioral characteristics of adversarial agents to prevent them from influencing a swarm’s decision making.

HERE Technologies

Boulder, CO

Supervisor: Dr. Jake Anderson

2017-2020

- Highly Autonomous Driving group. Our team built an automated, high-accuracy map to enable autonomous driving functionality from large scale vehicle sensor systems.
- Assisted in designing machine learning and statistical models of vehicle sensor data.
- Developed cloud infrastructure to scale data processing to analyze millions of kilometers daily.

NASA Langley Research Center - Dynamic Systems and Controls Branch

Hampton, VA

Advisor: Dr. Andrew Moore

Summer 2016

- Project: “Unmanned Aerial Vehicle Inspection of Electrical Transmission Structures”
- Research focused on UAV navigation methods, near the ground, that avoid fixed obstacles such as buildings, power lines and trees.

University of Arkansas - Computer Science

Fayetteville, AR

Advisor: Dr. Michael Gashler

2015-2017

- Thesis: “How neural networks learn from the experiences of peers through periodic weight averaging.”
- Investigated the impact of communication topologies had on federated learning algorithms.

Publications

UNPUBLISHED MANUSCRIPTS (IN PREP. OR UNDER REVIEW):

J. Bhagat Smith, J.A. Adams. “Adaptive Workload Modeling for Unknown Tasks”, ACM Transactions on Human-Robot Interaction, 2024. (In Preparation).

J. Bhagat Smith, J.A. Adams. “Improving Cross-task Workload Estimation with Bayesian Meta-Learning”, IEEE Transactions on Human Machine Systems, 2024. (In Review).

J. Bhagat Smith, P. Baskaran, J.A. Adams. “Influence of Honeybee Inspired Drifter Agents.” PloS one, 2024. (In Review).

J. Bhagat Smith, M.R. Giolando, V. Mallampati, P. Baskaran, J.A. Adams. “Experimental Design Principles for Develop Machine Learning Models for Human-Robot Interaction”, Springer Nature, Emerging Frontiers in Human-Robot Interaction, 2024. (In Review).

J. Bhagat Smith, J.A. Adams. “Workload Estimation for Unknown Tasks: A Survey of Machine Learning Under Distribution Shift”, in IEEE Transactions on Cognitive and Developmental Systems, 2024. (In Review).

PEER REVIEWED PUBLICATIONS:

J. Bhagat Smith, P. Baskaran, J.A. Adams. “Improving Transparency in Human-Collective Visualizations”, *IEEE International Symposium on Robot and Human Interactive Communication*, Pasadena, CA, USA, pp. 1-7 2024.

J. Bhagat Smith, V. Mallampati, P. Baskaran, M.R. Giolando, J.A. Adams, ‘Design Principles for Building Robust Human-Robot Interaction Machine Learning Models’, in *Companion of the ACM/IEEE International Conference on Human-Robot Interaction*, Late Breaking Report, 2024

F. Aderinto*, **J. Bhagat Smith***, M.R. Giolando, P. Baskaran, J.A. Adams, ‘Improving Human-Robot Team Transparency with Eye-tracking based Situation Awareness Assessment’, in *Companion of the ACM/IEEE International Conference on Human-Robot Interaction*, Late Breaking Report, USA, 2024 [**Best LBR Nominee**]

Mentoring_____

Mentees:

2023-2024 **Vivek Mallampati**, Robotics PhD Student, OSU

2023-2024 **Favour Aderinto**, Robotics PhD Student, OSU

2023 **Robert Lucas**, Undergraduates Research Assistant, OSU

2022 **Simone Angelo S. Toribio**, Research Experience for Undergraduates Student, OSU
